

Mobile heat exchangers have been designed and manufactured in Finland especially for heating during construction. With the heat exchanger, the heat from the district heating network is transferred to the construction site by water-circulating heaters.

PÄÄOMINAISUUDET

- The heat exchanger is built into a sturdy steel frame and its components are quality products from well-known manufacturers. The sturdy but compact heat exchanger has lifting eyes and forklift pockets for transfer. All components are easily accessible in an open frame.
- It is possible to use remote control in the heat exchanger. Through Regin Exigo Ardo remote control, you can see and adjust e.g. system pressure, primary and secondary temperatures, and clogging of the dirt separator. You will receive alerts about possible faults or power failures by e-mail or text message.

TEKNISET TIEDOT

Tuotekoodi	1030604002	**Controller**	Regin Exigo Ardo
Pump	Grundfors Magna 3 32-120F 220	**Secondary side connectors**	2 x Camlock 2”
Heat exchanger	Danfoss XB52M-1-60	**Dimensions L x W x H [mm]**	120 x 70 x 150 cm
