

Low voltage LED work light for rough use at construction site. The light-weight and robust 48V MBerg® lights are connected behind a 48V Valmu lighting transformer and together they form a very safe and reliable lighting system. System is reliable because no-one can take power to any other tool from the lighting line and thus disturb the line.

PÄÄOMINAISUUDET

- The connection of the MBerg light to the trunk line from the transformer is usually done with flat connectors or Winsta connectors.
- The heart of the MBerg light is a LED module whose components are small and light, so they do not tear off or break as a result of a severe impact. The luminaire has a strong and good hanging hook from which the luminaire can be hung. The light can also be attached through handle holes.
- Standard colors are blue and orange. Also available in the customer's own colors.

TEKNISET TIEDOT

Voltage	48 VAC	**Connection cable**	1,5m 2×1 mm2 H05RN-F
Power	21 W	**Weight**	0,7 kg
Light source	LED-moduuli (monipiste)	**IP-rating**	IP54
Light output	2000 lm	**Service life**	50 000 h
Valon värilampötila	5000 K	**Warranty (years)**	2 år
