

Light MBerg work light with battery backup. Normally it works like any MBerg light but during power failure it switched automatically to battery operation. Lights for 30 min with battery and after that switched off automatically to save battery. There is another 30 min left in the battery so there is never complete black out at the site.

PÄÄOMINAISUUDET

- Battery box is located under the handle so it is easy to replace the battery without opening the whole light fixture. On the battery box there are signal lights that show if the battery is charging, in use, ok or not ok. There is a off-switch on the battery box.
- Battery is covered with heating film so it can be charged even in freezing temperatures. Flicker free light. Made in Finland.

TEKNISET TIEDOT

Tuotekoodi	21301017	**IP-rating**	IP44
Voltage	48 V AC/DC	**Cable**	1,5m 2×1,5mm2
Power	21 W	**Charging time**	12 h
Light source	LED-modul	**Operating time with battery**	40 min + 30 min
Color temperature	5000 K	**Warranty (years)**	2 years
Weight	0,8 kg
