

Low voltage LED work light for rough use at construction site. The light-weight and robust 48V MBerg® lights are connected behind a 48V Valmu lighting transformer and together they form a very safe and reliable lighting system. System is reliable because no-one can take power to any other tool from the lighting line and thus disturb the line.

PÄÄOMINAISUUDET

- ▶ The connection of the MBerg light to the trunk line from the transformer is usually done with flat connectors or Winsta connectors.
- ▶ The heart of the MBerg light is a LED module whose components are small and light, so they do not tear off or break as a result of a severe impact. The luminaire has a strong and good hanging hook from which the luminaire can be hung. The light can also be attached through handle holes.
- ▶ Standard colors are blue and orange. Also available in the customer's own colors.

TEKNISET TIEDOT

Tuotekoodi	21005xxx	Varilampotila	5000 K
Jännite	48V AC	Weight	1 kg
Power	21 W	IP- and IK class	IP54 IK10
Valonlähde	LED-moduuli (monipiste)	Connection cable	1,5m 2 x 1 mm2 H05RR-F
Light output	2000 lm
