

SUBCABINET WITH FIXED INPUT AND PHASE LOAD MEASUREMENT TSR 63/125A

Tuotekortti · 5000334

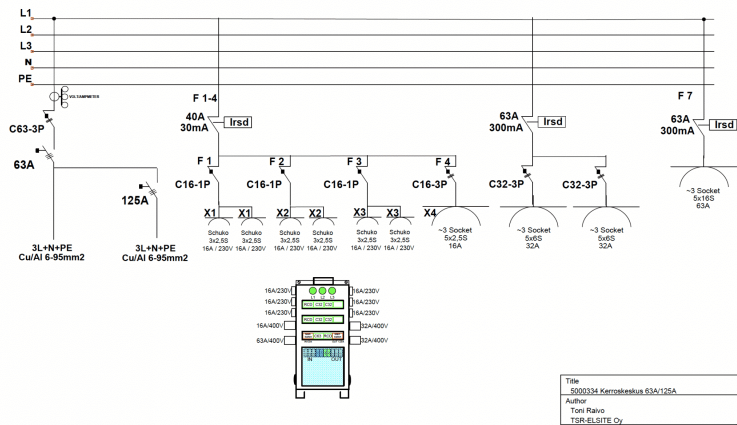

Fixed connection 63A floor cabinet with phase meters. Phase meters measure the current and voltage of each phase. In addition, the meters will come as indicator lights to indicate that power is being supplied to the phases. Through the lower part of the cabinet, 125A can be chained forward to the floors. The center is made of aluminium and has a light construction. The center is easy to carry on its handle and hang on a wall from the hanging loops. The center has legs and can be set on the floor. The center is manufactured in Finland and uses only high-quality European components such as PCE and Schneider. All parts of the center are available as spare parts. Alternations can be made according to the customer's wishes, e.g. the number and size of outlets can be customized.

TEKNISET TIEDOT

Tuotekoodi	5000334	230V lähtöjen vaiheet	1-1-2-2-3-3
Nominal Current	63 A		1 x C16 3P
Nominal voltage	400 V	Fuses	3 x C16 1P
RCD	1 x 40A/30mA, 2 x 63/300mA		2 x C32 3P
Weight	14,3 kg	Fixed outlet	1 x C63 3P
Dimensions (W x D x H)	46x37x22 cm		AL/CU 6-95mm2
Outlets	1 x 63A, 2 x 32A, 1 x 16A, 6 x 16A 230V	Kiinteä syöttö	125A AL/CU 6-95mm2
		Pääkytkin	125A
		Protection class	IP44
