

Compact generator light mast with integrated electrical system and vertical telescopic mast with manual lifting. The light mast is equipped with four 150W LED floodlights made in Europe and a Yanmar engine.

PÄÄOMINAISUUDET

- To increase operating efficiency, the light mast has a DSE3110 automatic control system with an integrated light sensor. The machine can thus operate automatically, which guarantees up to 40 hours of working time. The machine has air cooling system.
