LIGHT MAST 8,5M WITH GENERATOR

Tuotekortti · 60009996

The easy-to-move and handle 8,5 m generator light mast is well suited for both construction sites and events. The light mast has a high-quality Kubota engine. Forklift pockets and lifting hooks (5 pcs.) enable the mast to be moved with a crane and forklift.

PÄÄOMINAISUUDET

- Efficient lighting for an area of 3000 m2 is produced by 4 x 150W LED floodlights. Each luminaire has its own switch. The mast stepless winch works with a friction brake. The mast can be turned 350°.
- The telescopic mast is made of galvanized steel and the strong frame is powder coated. The mast's 5 stabilizers will keep it upright even in high winds. The mast has a residual current device as standard, as well as automatic shutdown in case of faults. Available with a drawbar shown in the picture.

TEKNISET TIEDOT

Tuotekoodi	60009996	**Fuel consumption**	0,55l/h (75%)
Length opened	2,3 – 8,5 m	**Operating time without refueling**	(max.) 145h
Number of lights	4	**Starter battery**	12V/18Ah
Illuminated area	3000 m2	**Dimensions closed**	239x138x264cm
Power output	230V (Shuko) max. 2 kVa	**Dimensions open**	239x237x850cm
Engine	Kubota Z482 Diesel	**Dry weight**	690 kg
Fuel tank	80 l	**Max. wind speed**	110 km/h
